E-TRONIX.COM

## CYBEROPTICS

**Cyber Optics (cyberoptics.com)** CyberOptics Corporation is a leading global developer and manufacturer of high precision sensing technology solutions. CyberOptics sensors are being used in surface mount technology (SMT) and semiconductor markets to significantly improve yields and productivity.

## DEK

**ASM Assembly Systems' Printing Solutions Division** is the market-leading provider of **DEK** brand printing technologies.

The DEK range of products and services includes screen and stencil printing equipment platforms, stencils, precision screens and process support products used for a variety electronics assembly, semiconductor packaging and alternative energy applications.

## Despatch INDUSTRIES

**Despatch Industries (despatch.com)** has specialized in thermal processing for over 100 years and manufactures batch and

continuous process ovens. Products include laboratory, cabinet, truck-in, clean room, sterilizing, burn-in, curing, drying, firing, annealing and heat treating ovens.

## GREAT LAKES ENGINEERING

**Great Lakes Engineering**

(greatlakeseng.com) is a trend-setting manufacturer of surface mount stencils, precision laser cut parts, photo chemical machined and electroformed stencils and parts for the defense, medical, electronics, aviation, energy, telecommunications, and computer industries. Great Lakes Engineering is ISO 9001:2008 certified, anITAR registered company and a distributor for Henkel Electronics.

## HAKKO

For over 50 years **Hakko (hakkousa.com)** has been producing superior quality soldering and desoldering tools, hot air rework stations, smoke and fume extraction systems, technical training classes, and a wide assortment of accessories and related equipment for the electronics, industrial and hobby industries. "Reliability", "Best Value", and "Excellent Service"

## Henkel

**Henkel's (henkel-adhesives.com/electronics)** leading brands of Emerson & Cuming, Hysol, Loctite, Technomelt and Multicore have long been recognized as the product brands to trust for printed circuit board assembly applications.

Henkel's advanced formulations ensure maximum processability and reliable in-field performance.

## KIC

**KIC (www.kicthermal.com)** offers an entire generation of smart technologies for reflow ovens, curing ovens, and wave solder machines, allowing you to reduce production costs, to improve quality, and to add capabilities that you can use to win new business.

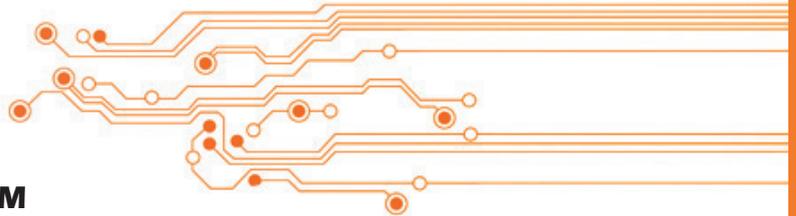

## komax WIRE

**(komaxusa.com)** With quality and efficiency requirements becoming ever tougher and component miniaturization ever more

common, the industry is being pushed into automating an increasing number of processes. Komax offers a comprehensive range of wire processing machines to meet the demands of modern wire processing.

## LINDSTROM

**Lindstrom (lindstromtools.com)** has developed and produced high-precision tools since 1856 - making us the oldest continuous producer of handtools in existence today. From our large assortment of benchmark cutters and pliers to our Swiss-made precision tweezers, state-of-the-art screwdrivers and torque screwdrivers, we will fulfill the advanced needs of the professional user.

## LPMS USA

**LPMS USA (lpms-usa.com)** is the world's largest Low Pressure Molding Solutions provider. Our systems are engineered to encapsulate, coat and protect delicate electrical components with a low viscosity resin to provide environmental and physical protection. This environmentally safe, single step process uses much less material than the traditional potting process, requires no housing and can produce finished parts in seconds.

## MENDA

**MENDA (mendapump.com)** is Desco Industries, Specialty Tools division. MENDA is famous for its high performance line of "dish type" liquid dispenser pumps and bottles. MENDA's product offering now includes products such as soldering aids, Circuitracers, Cable Manager, ESD Workstation Organizers, ESD Vacuums and more.

## mta

**mta automation inc. (mtaautomation.com)** provides a complete line of various automated soldering, dispensing, and assembly technologies covering a wide range of applications. Examples include iron- and laser-based selective soldering as well as single- and two-component dispensing. Additionally, mta offers complete integrated and automation solutions for the assembly process.

## NT

**Nathan Trotter**  
Trusted for Over 200 Years

**Nathan Trotter (nathantrrotter.com)**

Established in 1789, Nathan Trotter produces high quality bar solder for electronics applications. Nathan Trotter is the largest importer of tin in North America and is able to offer exceptional pricing and delivery on all tin-lead and lead free alloys.

## SCS

**SCS (StaticControl.com)** is regarded as an industry leader when it comes to ESD Solutions. Beyond the everyday ESD

grounding devices, such as heel grounders, wrist straps & ESD mats, SCS offers high-end monitoring equipment for ESD control & compliance. These products help electronic manufacturers manage their ESD program and create a comprehensive Static Management Program (SMP) using a system of test equipment and software to monitor ESD control compliance in real-time, which will increase product quality, production yields and reliability.

## SIPLACE

**ASM Assembly Systems' is the market leading provider of SIPLACE brand SMT Placement Systems, production optimi-**

**zation software, and process expertise.** The SIPLACE product range is configurable to match the needs of very high volume to high mix - low volume manufacturing. Today's SIPLACE platform offers unique innovations and capability to accelerate product changeover, quickly adapt to schedule/capacity changes, and produce to a 6 Sigma Quality level.

## STONE MOUNTAIN TOOL

**StoneMountainTool (stonemountaintool.com)**

designs and builds engineered solutions, creating custom tools that exceed expectations every time. Stone Mountain Tool stands out as one of the leaders in the industry, and with over 20 years in supplying tooling for the electronic manufacturing industry.

## TE connectivity

Ensuring a quality connection is essential to delivering high performance and reliability in extreme environments. From crimping a terminal onto a wire or pressing a connector onto a board, TE Connectivity (TE) Application Tooling equipment and services are designed to maximize production uptime, extend tooling life and minimize manufacturing waste.
